

# Qing Ou

---

Full-stack developer with experience delivering web and backend solutions with C#, .NET, JavaScript frameworks and SQL Server in healthcare and insurance domains. Strong background in RESTful APIs and cloud-based integrations. Proven track record of owning features from design through production support, collaborating closely with business stakeholders while working in Agile environments.

## TECHNICAL SKILLS:

### Primary Technologies:

- C#, .NET, ASP.NET MVC
- JavaScript, TypeScript, HTML, CSS
- SQL Server, Store Procedure, Azure CosmosDB
- RESTful APIs, Postman

### Cloud and Platforms:

- Azure Functions, Azure Event Grid, Azure App Configuration
- Integrations with Salesforce, Microsoft Dynamics CRM and Azure

### Tools and practices:

- Git, TFS, Microsoft Visual Studio, VS Code
- Unit testing, Integration Testing, debugging, production support, on call rotation
- Agile and Scrum methodology, iterative delivery, backlog refinement

### Additional exposure:

- React, React Native, Vue.js, Node.js, NativeScript, Tailwind CSS
- Windows, Mac OS, iOS, Android
- Microsoft Office, hardware and software troubleshooting

## PROFESSIONAL EXPERIENCE

**Embrace Pet Insurance, Warrensville Heights, OH /**

**Hexaware Technologies, Jersey City, New Jersey**

**Mar 2021 – Present**

*IT Department*

### Software Developer

- Transitioned via corporate rebadging to continue as a Software Developer for Embrace Pet Insurance, preserving application and domain knowledge.
- Develop and maintained backend APIs within a microservices architecture using C#, .NET, and SQL Server.
- Develop a Vue.js one-click purchase page for internal employees, featuring prefilled data, inline editing, and UI components for pet selection and wellness options.
- Build and maintain integrations between internal policy systems and external platforms such as Salesforce and Microsoft Dynamics CRM
- Develop features for the MyEmbrace customer portal using ASP.NET MVC, HTML, JavaScript, and C#.
- Build new functionality for the Quote Engine V3 application using Angular, TypeScript, and reusable UI components integrated with backend RESTful APIs.
- Build plugins to support and extend Microsoft Dynamics CRM, integrating with internal systems and improving workflow efficiency for business users.

- Integrate Salesforce with internal systems by developing Azure functions that process, transform, and transmit data via secure REST APIs.
- Collaborate with business partners to clarify requirements, estimate work, and deliver incremental value in an Agile environment.
- Provide troubleshooting and production support for customer-facing applications, including participation in on call rotations.

**Trilogy Education Services, (Remote, US)**

**Nov 2021 – Jun 2023**

*Butler University*

**Full Stack Web Development TA (Part-time)**

- Supported cohorts of full stack bootcamp students by answering technical questions individually and in groups.
- Assisted the lead instructor to keep students aligned with the curriculum and project milestones.
- Coached students through lab activities and projects across HTML, CSS, JavaScript, MySQL and backend fundamentals.
- Provided clear explanations and feedback while maintaining empathy and encouragement for learners with diverse backgrounds.

**University Hospitals, Shaker Heights, OH**

**Dec 2017 - Mar 2021**

*IT Department*

**Full Stack Developer (Mobile/Web)**

- Developed new features and optimize existing functionality for Self-Scheduling mobile application using NativeScript, JavaScript, HTML and CSS.
- Implemented backend services in C# to support mobile application using Visual Studio 2015 and SQL Server.
- Designed user interfaces that improved usability and patient scheduling flow.
- Wrote MSSQL stored procedures to enhance Self-Scheduling mobile application.
- Maintained Azure search service and data synchronization process to support autocomplete UI widget that searches a union of providers, specialties, and conditions.
- Supported other developers with issues involving our mobile application framework, including debugging complex issues.
- Participated in an On-Call production support rotation to ensure availability of patient-facing systems.

**Medical Mutual, Cleveland, OH**

**May 2013 - Dec 2017**

*IT Department*

**Software Developer II (Mobile/Web)**

- Created and maintained Android and iOS applications using a cross-platform development framework (Kony) integrated with C# backend services.
- Developed backend services for mobile and web applications using C# in Visual Studio 2012 and 2015 with SQL Server.
- Enhanced existing web and mobile applications using JavaScript, HTML, and CSS to support new business requirements.
- Designed user interfaces for web and mobile applications focused on member self-service.
- Tested new and existing applications and coordinated with QA to validate releases.
- Led the production deployment process for web and mobile applications and their backend services, working closely with operations and business stakeholders.
- Practiced Agile development methodology, participating in sprint planning, daily stand ups, and retrospectives.

**Case Western Reserve University, Cleveland, OH**

**May 2012 - May 2013**

*Undergraduate Studies Office*

**Analyst Programmer I**

- Maintained a complex degree audit system with support for ongoing curricular changes.
- Designed, tested, and implemented application changes for new and updated degree requirements.
- Supported deans and administrative staff with data extracts, reports, and transcripts.
- Coordinated electronic AP test credit posting for new student orientation and periodic updates.

**Veterans Administration Hospital, Cleveland, OH**

**Dec 2010 - Jul 2013**

*Nuclear Medicine Department*

**Student IT- Programmer (Part-time evenings/weekends)**

- Troubleshot issues with the Nuclear Medicine patient scheduling SharePoint site.
- Added and maintained features on the department scheduling SharePoint site using SharePoint Designer.
- Developed an automated post appointment letter generation process using Microsoft Access, reducing manual work for staff.

**Cleveland State University, Cleveland, OH**

**May 2010-May 2011**

*IS&T Department*

**Desktop Support Technician Level I**

- Set up and configured new computers for university staff and computer labs.
- Diagnosed and resolved hardware and software issues for staff.
- Managed student computer labs by re-imaging computers each term and installing or updating software as needed.

**EDUCATION**

**Cleveland State University**

**June 2007-August 2011**

*Bachelor of Business Administration*

- Information Systems (IS) major with minor in Mathematics
- Recipient of full merit scholarship, **GPA 3.56**

**CONTINUING EDUCATION**

- PluralSight courses; FreeCodeCamp Tutorials; YouTube Tutorials; Udemy
